IBR Early Intervention Evaluation Center

About the Center

The New York State Institute for Basic Research (IBR) Early Intervention Evaluation Center specializes in center-based, comprehensive assessments for newborns, infants and toddlers, from birth to age three.

IBR's center-based program provides developmental evaluations including assessments in the areas of:

- Cognitive development (thinking, memory and problem solving)
- Speech and language development
- Motor development
- Social and emotional development
- Adaptive behavior
- Sensory processing

Our Specialties

We provide a highly specialized assessment that has been developed for high-risk babies from birth until one month of age that is able to provide early developmental information to ensure the earliest introduction of intervention.

IBR also has extensive experience in autism screening and diagnostic evaluation.

Evaluator credentials

Our evaluators are all state-approved, licensed and/or certified according to New York State

regulations and are under contract with New York City. Our team has many years of experience evaluating newborns, infants and toddlers who are at risk for or who present with developmental delay or disabilities.

Eligibility for Services

Eligibility for early intervention services is determined by our State-approved evaluators who are under contract with New York City. Our center will work with the New York City Bureau of Early Intervention and the family to develop a plan for services to best address the child's needs. All services must be authorized by the New York City Bureau of Early Intervention, which will then arrange for service providers to deliver services to your child.

If early intervention services are delivered in child care settings or community locations that require a fee, the parent is responsible for paying any costs associated with access to the child care or community location.

Referrals

To request an early intervention evaluation, call the New York City Early Intervention Program in the borough in which you live, or call 311.

Staten Island	718-420-5350
Brooklyn:	718-722-2998
Manhattan:	212-487-7071
Queens:	718-271-6114
Bronx:	718-410-4504

- All evaluations are provided at no out-of-pocket costs to parents, but the municipality may access the family/child's health insurance for reimbursement.
- The IBR Early Intervention Center is approved by the New York State Department of Health and is under contract with the New York City Department of Health and Mental Hygiene.
- The New York City Early Intervention Program is a public program funded by New York State and county government.
